

BeSafe

PROTECTING YOUR DOG from fleas, ticks and mosquitoes is very important because these parasites may transmit serious, even life-threatening, diseases. It's just as important to protect your dog by making the right choices and taking the right steps with flea & tick control. Here's a quick way to remember the basics.

S

Select the right product for your dog.

A

Ask your veterinarian for advice.

F

Follow all directions on the label.

E

Enjoy happy times with your dog.
